

# Business Credit Card Online Access

## Managing Your Credit Card

## Important Changes to your Business Credit Card Online Access!

Business Credit Card Online Access has moved to a new digital platform.<sup>1</sup> Continue managing your business credit card online with a new, streamlined experience.

[Register now](#)

The new Credit Card Online platform will continue to offer key functionalities and enhancements to:

-  Review transactions to verify account activity.
-  View statements AND automatically be notified by email when your statement is ready.
-  Make payments and manage alerts.<sup>2</sup>

PLUS

Registration with the Company Account Number, found on the billing statement, will provide Administrator Access to:

-  Quickly maintain user information through the Administration tab.
-  Register additional cardholders for online account access.
-  Reset passwords and assist users who have been locked out of their account.

AND

-  Any new cards issued on the account will be automatically linked to the Administrator profile.

### Here's how you can prepare to register:

1. Determine what credit card account information you want to manage and what account number is needed to register.
  - **Business Owner or Administrator:** Manage the business credit card program.  
You will need the company account number found on your billing statement, not the number displayed on your credit card.
  - **Cardholder:** Manage your individual credit card account(s) only.  
You will need the 16-digit account number displayed on your credit card.

**Please note:** When prompted for Cardholder or Business Name and other information, it must be entered exactly as it is on the account. The business name could be the legal name or the business name displayed on the card(s).

2. If you were previously set up to receive electronic-only statements and are not yet registered in the new platform, you will receive paper statements. Once registered, you can manage your statement delivery options.

Check out our [Registration & User Guide](#) which contains valuable instructions on using the new platform.
